

AIR MONITORING SOLUTION

SENSING-AS-A-SERVICE

Clarity's sensing-as-a-service monitoring solution makes it more accessible, reliable, and cost-effective, to measure and manage air pollution. Our IoT monitors and toolbox of cloud services deliver high resolution PM_{2.5} and NO₂ measurements when and where you need them.

Reliable monitoring for:

- Exposure Assessment
- Impact Analysis
- Emergency Response
- Regulatory Compliance
- Facilities Management
- Health & Safety

WHY CLARITY?

Transparent Ownership

Service license includes hardware, software, and project support. 100% user-owned data.

Scalable Deployment

Wireless upload and storage on Clarity Cloud. Collect and access data anywhere.

Hassle-free Hardware

Self-powered, UV/weather-resistant monitor with cellular connectivity. 10-minute setup.

Reliable Insights

Dedicated environmental project manager. Remote calibration service (when available).

Trusted by 85 cities in 50+ countries
